

Y-TECH SERVICES

“ Technology plays a vital role in work fields today, **Y-Tech** a company specialized in providing solutions that help you to complete your work ,whether it is a customized service or a group of services, whether you are looking for a complete technical management or for the reassurance that there is a team of IT engineers.

Always by your side.

Y-Tech is your smart partner that you can trust in technology solutions. ”

DATA CENTERS

Organizational difficulties that businesses have with their IT infrastructure often leave them with difficulties and deficits that hinder overall operational effectiveness. For this reason, companies need to have a strategy in place when setting up their business' computing infrastructure. When searching for the right company to help you set up and manage your IT infrastructure, you have to take into consideration the company's competence in keeping your office organized.

At Data Center Solutions, our services promote the implementation and management of a coordinated, efficient, and dynamic computing infrastructure that is designed to take your company where you want it to go. Our infrastructure strategy is made up of four crucial variables that are designed to provide organizations with a clean and dynamic computing infrastructure.

Server Room Design New technologies have radically changed the modern server room.

Server Rack Design Customized solutions to ensure that all of your servers are secure and reliable.

Battery Backup Complete battery backup that works to protect your infrastructure.

Cable Management Comprehensive cabling and wiring strategies to build a safe and efficient office.

ENTERPRISE DATA STORAGE

Build the right foundation for your data-driven IT infrastructure with powerful storage solutions. Storage solutions for storage data protection and cyber resilience ensure continuity of operations, better performance, and lower infrastructure costs. They simplify VM, application, and container backup and recovery, which improves storage efficiency, and provides data isolation throughout your hybrid cloud infrastructure.

What Data Storage Solutions Delivers?

- Files are accessible any time.
- Cost savings & Overall budget.
- Data security.
- No need to physically move data.
- Less chance of data loss.
- Better efficiency.

What Y-tech Delivers?

- NAS Storages Configuration.
- Backup Solution Based on Data Storages.
- File Sharing and data accessibility configuration.
- Operating Systems Based on Data Storages.

HIGH END WIRELESS SYSTEM

Y-Tech Provides The standard for high-performance Wi-Fi

Using A thoughtfully designed product family.
The price / performance leader in enterprise Wi-Fi 6
advanced antenna design for extended range.
Multi Comfortable Mounting Choices.
Stylish design for your home or workplace

We provide an advanced wireless Systems with high performance, extended range, and a well-designed control panel. You can get reliable wireless coverage for large areas at prices that small businesses can afford.

Installing Wireless Controllers to avoid channels Conflicts and Achieving standardization of SSID's

Achieving Most Widely Coverage Areas with least number of Access points.

Performing speed and stable wireless networks that You can trust it for your business

IT CONSULTING

In management, information technology consulting is a field of activity which focuses on advising organizations on how best to use information technology (IT) in achieving their business objectives.

Our company Rule is to support and nurture the company from the very beginning of the project until the end, and deliver the project not only in the scope, time and cost but also with complete customer satisfaction

IT INFRASTRUCTURE

Organizational difficulties that businesses have with their IT infrastructure often leave them with difficulties and deficits that hinder overall operational effectiveness. For this reason, companies need to have a strategy in place when setting up their business' computing infrastructure. When searching for the right company to help you set up and manage your IT infrastructure, you have to take into consideration the company's competence in keeping your office organized.

At IT infrastructure Solutions, our services promote the implementation and management of a coordinated, efficient, and dynamic computing infrastructure that is designed to take your company where you want it to go. Our infrastructure strategy is made up of four crucial variables that are designed to provide organizations with a clean and dynamic computing infrastructure.

Server Room Design New technologies have radically changed the modern server room.

Server Rack Design Customized solutions to ensure that all of your servers are secure and reliable.

Battery Backup Complete battery backup that works to protect your infrastructure.

Cable Management Comprehensive cabling and wiring strategies to build a safe and efficient office.

IT SUPPORT

HAS THAT TECHNOLOGY EVER LET YOU DOWN?

If you are like other businesses, you have your fair share of horror stories. Whether you have tales of downtime brought on by computer or network problems, or simply don't like how much your organization is paying to keep your IT up and running, IT Support Solutions is here to produce results. Our flat-rate service plan will deliver your company enterprise.

YOUR BENEFITS IN THIS FIELD:

- Professional Server Support.
- Virtual Server Management.
- Server Consulting and Best Practices.
- VMware Services.
- Microsoft Hyper-V Services.
- IT Support Solutions.
- IT Consulting Services.
- 24/7 Helpdesk Services.
- Remote Monitoring and Maintenance.

“ MAINTENANCE ”

How many of your workstations or your equipments are out of date and due to be refreshed? Many times, it's a matter of taking on the capital expense of buying new hardware, but eventually you'll begin to see the affect it has on your company's efficiency. Inefficiency that results from malfunctioning or antiquated hardware will cost you more in downtime than you may realize.

But don't worry in both cases!

Y-Tech Provides Hardware Maintenance For your devices

Ram Upgrade.
Hard Disk Replacement.
OS installation.
Programs Packages.

IT SECURITY

What do you get from IT security?

IT security prevents malicious threats and potential security breaches that can have a huge impact on your organization. When you enter your internal company network, IT security helps ensure only authorized users can access and make changes to sensitive information that resides there. IT security works to ensure the confidentiality of your organization's data.

What Y-Tech Provides in this field ?

Network security is used to prevent unauthorized or malicious users from getting inside your network. This ensures that usability, reliability, and integrity are uncompromised. This type of security is necessary to prevent a hacker from accessing data inside the network. It also prevents them from negatively affecting your users' ability to access or use the network.

Internet security involves the protection of information that is sent and received in browsers, as well as network security involving web-based applications. These protections are designed to monitor incoming internet traffic for malware as well as unwanted traffic. This protection may come in the form of firewalls, antimalware, and antispyware

Endpoint security provides protection at the device level. Devices that may be secured by endpoint security include cell phones, tablets, laptops, and desktop computers. Endpoint security will prevent your devices from accessing malicious networks that may be a threat to your organization. Advance malware protection and device management software are examples of endpoint security

SURVEILLANCE

Surveillance systems are an essential part of securing your home or business. These systems can range from wireless home security cameras to sophisticated alarm systems that notify and send notifications at the first sign of trouble.

Our technologies enable individuals, businesses and government sectors to detect risks and events before and after they occur and respond to them faster, more accurately and more effectively than ever before.

Y-Tech services in this field:

- Installation, operation and programming of monitoring systems with the best quality according to standards.
- Study of monitoring projects for large and medium enterprises.
- Maintaining pre-installed monitoring systems and making adjustments to achieve the required vision.

VIRTUALIZATION

How to Maximize Efficiency with Virtualization Software?

IT teams are under constant pressure to meet fluctuating market trends and heightened customer demands. At the same time, they must stretch IT resources to accommodate increasingly complex projects. Fortunately, Virtualization helps balance the need for both better business outcomes and IT savings.

Virtualization enables you to:

- Consolidate hardware for higher capacity utilization.
- Increase performance for a competitive edge.
- Streamline IT administration through centralized management.
- Minimize hardware resources needed to run the hypervisor, meaning greater efficiency.

What Y-Tech Delivers?

VMWare vSphere Servers Installation and Configuration.
VMWare vCenter Servers Installation and Configuration.
Hyper-V Servers Installation and Configuration.

Features

By consolidating multiple servers onto fewer physical devices, Virtualization reduces space, power and IT administrative requirements while driving high-speed performance.

■ **Reliable Performance.** Accommodate apps of any size. Configure virtual machines up to 128 virtual CPUs, 6 TB of RAM and 120 devices to satisfy all your application needs.

■ **Enhanced Security.** Protect sensitive virtual machine data with powerful encryption capabilities. Role-based access simplifies administration, and extensive logging and auditing ensure greater accountability and easier forensic analysis.

■ **User-Friendly Experience.** Manage day-to-day administrative operations with built-in modern UI based on HTML5 standards. For customers who need to automate their operations, VMware offers both a vSphere Command Line Interface and developer-friendly REST-based APIs.
